

S.A ENGINEERING COLLEGE, CHENNAI – 77
(Autonomous- Institute Level Research Centre, Affiliated to Anna University)
DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
PROJECT LABORATORY

The **Project Laboratory** provides students with a platform to apply theoretical knowledge from various courses to **real-world engineering problems**. It emphasizes **hands-on learning, innovation, problem-solving, and teamwork**, enabling students to design, implement, and evaluate solutions under faculty and industry guidance.

The lab serves as a **bridge between academics and practical application**, aligning with the **Outcome-Based Education (OBE)** framework and fulfilling Program Outcomes (POs) and Program Specific Outcomes (PSOs).

Objectives

1. To enable students to **identify, analyse, and solve engineering problems** using modern tools and technologies.
2. To develop **design, coding, and testing skills** through individual and team-based projects.
3. To encourage **innovation, creativity, and entrepreneurship** among students.
4. To improve **communication, documentation, and presentation skills** through project reporting and demonstration.
5. To foster **teamwork, leadership, and project management skills**.

Project Laboratory – System Configuration

S.No	Equipment Description	Specifications / Details
1	Desktop Model	Lenovo ThinkCentre Neo 30S Gen 5
2	Processor	13th Generation Intel® Core™ i7-13620H (E-cores up to 3.60 GHz, P-cores up to 4.90 GHz)
3	Memory (RAM)	16 GB DDR5 – 5200 MHz (SODIMM)
4	Storage	512 GB SSD, M.2 2280 PCIe Gen4 TLC Opal
5	Display	20" LED Monitor
6	Input Devices	USB Keyboard and USB Optical Mouse
7	Audio	Internal Speaker

S.No	Equipment Description	Specifications / Details
8	Operating System / Software	(To be filled – e.g., Windows 11 / Ubuntu / Required IDEs / Project Tools)

Meta Quest 3S (128 GB)

- Used by students for **Augmented Reality (AR), Virtual Reality (VR), and Mixed Reality (MR)** based projects.
- Enables the development of **immersive applications** in areas such as education, healthcare, manufacturing, architecture, and gaming.
- Supports **Unity, Unreal Engine**, and other XR SDKs for application prototyping.
- Facilitates **hands-on learning** in human-computer interaction, 3D visualization, and simulation environments.
- Helps students understand the integration of **hardware sensors, motion tracking, and real-time rendering**.

Activities Conducted

- **Mini-projects and Major Projects** in various domains (AI/ML, Cloud Computing, IoT, Cybersecurity, Embedded Systems).
- **Project Reviews and Evaluations** at multiple stages (synopsis, design, implementation, final demo).
- **Participation in Competitions / Expos** showcasing innovative solutions.

Outcomes

- Students gain **hands-on experience** in applying theoretical concepts to practical problems.
- Development of **industry-relevant skills** in design, implementation, and evaluation.
- Enhanced **teamwork, innovation, and research skills**.
- Creation of **project portfolios** for placements, competitions, and higher studies.
- Contribution to **Program Outcomes (POs)** such as problem analysis, modern tool usage, communication skills, and lifelong learning.

INDUSTRY SUPPORTED LABORATORY

PURPOSE

The **Industry Supported Laboratory** serves as a collaborative platform between the **institution and industry** partners to bridge the gap between academic learning and real-world technological practices. It enables students to gain practical exposure to **current industrial tools, platforms, and methodologies** through hands-on experiments, live demonstrations, and internship guided by industry mentors.

Objectives

1. To align laboratory practices with **industry standards and emerging technologies**.
2. To provide students with **hands-on training** using industrial-grade software, hardware, or cloud platforms.
3. To enhance **employability skills** through real-world applications and problem-solving exercises.
4. To promote **industry-academia collaboration** through joint projects, workshops, and mentoring sessions.
5. To facilitate **innovation and entrepreneurship** by exposing students to real-time industrial challenges.

Infrastructure Details

S.No	Equipment Description	Specifications / Details	Usage / Remarks
1	Desktop System	Lenovo Neo 50s Gen 3 – 12th Generation Intel Core i5-12400 @ 2.50 GHz, 8 GB DDR-4 RAM, 500 GB NVMe SSD, Lenovo 19" LED Monitor, Lenovo Keyboard & Mouse	Used for project development, coding, and deployment in cloud and IoT environments.
2	Development Board	UpSquared Board (Intel Celeron N3350, 2 GB RAM / 32 GB eMMC) with Power Supply (5V @ 6A)	Supports edge computing, IoT, and embedded system projects.

S.No	Equipment Description	Specifications / Details	Usage / Remarks
3	Accessories & Modules	- US Power Cord - 16 USB Memory Sticks - Micro USB 3.0 Serial Cable - Grove LCD RGB Backlight - Grove Rotary Angle Sensor - Grove Light Sensor v1.2 - Grove Button - Grove Temperature & Humidity Sensor - Grove Green LED	Used for hardware interfacing, IoT sensor data acquisition, and embedded experiments.
4	Network & Connectivity Devices	Wi-Fi Modules (802.11), Intel Dual Band Wireless-AC 3165 BT 4.2, M.2 2230 with antenna (2.4 GHz)	Enables wireless connectivity for IoT experiments.
5	Additional Components	PCB PicoU Ant Coax Cable to IPEX MHF4 (1.13L, 100mm, UpSquared)	For improved signal transmission and antenna connection.
6	Display Units	Dell 18.5" LED Monitor	Used as a secondary display for hardware interfacing and system monitoring.
7	Networking Device	D-Link AC1200 Wi-Fi Router	Provides wireless access for IoT and cloud integration experiments.
8	Peripheral Devices	Dell USB Keyboard	Used for input and device interaction.

TANCAM Core Tools (on campus)

The foundation of the TANCAM SPOKE Centre is the **3DEXPERIENCE platform from Dassault Systems**, a globally recognised suite of tools. This integrated platform provides comprehensive capabilities across various engineering domains:

- **Design (CATIA):** Create detailed 3D models and product designs for core engineering departments—Mechanical, Civil, Electrical & Electronics (EEE), and Electronics & Communication (ECE).
- **Simulations (SIMULIA – Abaqus):** To perform advanced virtual testing and analysis for all engineering disciplines.
- **Digital Manufacturing (DELMIA):** For planning, simulating, and optimising manufacturing processes.
- **Product Lifecycle Management (PLM) (ENOVIA):** To manage data, collaboration, and the entire lifecycle of a product from conception to disposal.

Usage in Industry-Supported Laboratory

- Supports IoT, Edge Computing, Cloud Integration, and Embedded Systems projects.
- Enables hands-on training for students to develop and deploy smart applications.
- Used for student mini-projects, major projects, workshops, and hackathons under industry guidance.
- Integrated with cloud-based platforms for real-time data processing and visualization.
- Provides industry-relevant exposure to hardware-software integration.

Activities Conducted

- Hands-on sessions and workshops by industry experts.
- Mini and major projects executed using industrial datasets and tools.
- Certification programs through industry partners (e.g., AWS, Cisco).
- Hackathons and idea challenges sponsored by the industry.
- Faculty development and training programs for skill upgradation.

Outcomes and Impact

- Improved student skill alignment with industry requirements.
- Enhanced placement and internship opportunities.
- Development of industry-ready prototypes and projects.
- Contribution to Program Outcomes (POs) related to modern tool usage, problem analysis, and lifelong learning.

S.A. ENGINEERING COLLEGE, CHENNAI-77

(Autonomous Institution, Institute Level Research Centre-Affiliated to Anna University)

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

LIST OF SOFTWARES (R&D)

Category	Tool/Framework	Purpose
AI Tools	Turnitin	Plagiarism Check
Annotation Tools	Labelling	Image annotation
Annotation Tools	Doccano	Text annotation
Annotation Tools	Labelling	Image annotation
Annotation Tools	Tabula	PDF Table Extraction
Annotation Tools	PDFMiner	PDF Text Extraction
Annotation Tools	Apache Tika	Content Detection and Analysis
Reference Management	Citavi	Reference and Project Management
Reference Management	Zotero	Reference Management Tool
Reference Management	Mendeley	Reference Management Tool
LaTeX Editor	Overleaf	Authoring Tool
Deep Learning Frameworks	PyTorch	Deep Learning library
Deep Learning Frameworks	Keras	Deep Learning library
Deep Learning Frameworks	Apache MXNet	Scalable Deep Learning framework
AI Tools	RapidMiner	Data Science and Machine Learning Platform
AI Tools	KNIME	Data Analytics and Machine Learning
AI Tools	DataRobot	AI Cloud Platform
AI Tools	Watson Studio	Data Science and AI Platform
AI Tools	Google AI Hub	AI Models and Pipelines
AI Tools	Overleaf	Collaborative cloud-based LaTeX editor

HOD/CSE

SA ENGINEERING COLLEGE, CHENNAI - 77

(Autonomous- Institute Level Research Centre, Affiliated to Anna University)

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

RESEARCH LABORATORY

Department Research Activities

- Faculty and student involvement in research and development
- Generation of publications, patents, and projects
- Contribution to academic knowledge, industry solutions, and societal impact.
- Alignment with Program Outcomes (POs) like lifelong learning, innovation, and modern tool usage.

Objectives

1. To record faculty and student research contributions.
2. To showcase the department's research culture and initiatives.
3. To provide evidence for NBA criteria related to research and innovation.
4. To track external funding, collaborations, and consultancy projects

Lab Equipment Details

S.No	Equipment	Specifications / Details	Usage / Remarks
1	Desktop System	Lenovo ThinkCentre Neo 30S Gen5	High-performance desktop for project development, cloud computing, and software implementation
2	Processor	13th Generation Intel® Core™ i7-13620H (E-cores up to 3.60 GHz, P-cores up to 4.90 GHz)	Handles computation-intensive tasks and simulations
3	Memory (RAM)	16 GB DDR5 - 5200 MHz (SODIMM)	Supports multitasking and high-performance applications
4	Storage	512 GB SSD, M.2 2280 PCIe Gen4 TLC Opal	Fast read/write for large project files and software installations
5	Display	20" LED Monitor	Provides clear display for development, coding, and visualization

S.No	Equipment	Specifications / Details	Usage / Remarks
6	Input Devices	USB Keyboard & Mouse	Standard input for programming and lab work
7	Audio	Internal Speaker	Used for system alerts, notifications, and multimedia applications

Usage in Laboratory

- Supports AI/ML, Cloud, IoT, and Embedded Systems projects.
- Enables hands-on experiments, coding, and simulations for students.
- Can be used for project demonstrations, workshops, and collaborative lab activities.
- High-end specs allow smooth operation of industry-standard software and development tools.

Meta Quest 3S (128 GB)

- Used by students for Augmented Reality (AR), Virtual Reality (VR), and Mixed Reality (MR)-based projects.
- Enables the development of immersive applications in areas such as education, healthcare, manufacturing, architecture, and gaming.
- Supports Unity, Unreal Engine, and other XR SDKs for application prototyping.
- Facilitates hands-on learning in human-computer interaction, 3D visualization, and simulation environments.

Research Activities File

The file should include the following sections:

A. Faculty Research Profile

- Faculty Name, Designation, and Area of Specialization
- Research Interests
- Ongoing and Completed Research Projects
- Funded Projects (Government / Industry / Private) with funding agency, amount, and duration
- Patents Filed / Granted (with patent numbers and date)

B. Publications

- Journals (Indexed / Scopus / SCI / Web of Science)
- Conference Proceedings (National / International)

- Book Chapters, Edited Volumes, Monographs
- Citations and h-index (optional)

C. Research Collaborations

- MoUs with research labs, universities, or industries
- Collaborative projects (national/international)
- Faculty exchange programs

D. Student Research Contributions

- Student papers published in journals / conferences
- Student participation in **research competitions, hackathons, or innovation challenges**
- Undergraduate or postgraduate dissertations with faculty guidance

E. Workshops / Seminars / FDPs

- Workshops, seminars, webinars, or FDPs organized by faculty in research areas
- Guest lectures by industry/research experts

F. Awards / Recognition

- Awards received by faculty or students for research work
- Fellowships, grants, or recognition by professional bodies (IEEE, ACM, ISTE, etc.)

G. Research Infrastructure

- Departmental research labs with high-end instruments, software, and computing facilities
- Cloud or simulation platforms
- Specialized equipment supporting research activities

H. Evidence / Supporting Documents

- Copies of MoUs or collaboration letters
- **Project sanction letters / grant approvals**
- **Patent certificates / publications**
- **Workshop / seminar certificates**
- **Photographs** of research activities, lab setup, and events

Outcomes

After engaging in research lab activities, students are expected to be able to:

1. Problem Identification & Analysis

- Identify real-world engineering problems and research gaps.
- Formulate research objectives and hypotheses.

- Conduct literature surveys and review current methodologies.

2. Research Design & Methodology

- Design experiments, simulations, or computational models.
- Apply appropriate research methods, techniques, and tools.
- Ensure ethical considerations and safety compliance.

3. Technical Skills Development

- Gain proficiency in specialized tools, software, and laboratory instruments.
- Analyze and interpret experimental or simulation data effectively.
- Develop coding, modeling, and visualization skills (depending on domain).

4. Innovation & Critical Thinking

- Develop creative and innovative solutions to complex problems.
- Evaluate alternative approaches critically.
- Contribute to new knowledge in the field through experimentation or modeling.

5. Communication & Documentation

- Prepare structured **research reports, abstracts, and publications.**
- Present research findings in **seminars, workshops, and conferences.**
- Enhance **technical writing, presentation, and collaboration skills.**

6. Outcome Measurement

- Successful completion of research projects, papers, patents, or prototypes.
- Participation in conferences, competitions, or exhibitions.
- Contribution to departmental or institutional research goals.
