Feedback Summary	Students gained exposure to real-time software project development, IoT applications, AI/ML basics, and internship opportunities at CodeBind. Sessions were interactive and skill-oriented.	PO1-90.1% PO2-88.3% PO3-87.5% PO4-83.2% PO5-91.0% PO6-81.95% PO7-86.8% PO8-84.1% PO9-85.9% PO10-86.7% PO11-87.5% PO12-88.9%	Excellent industry interface; students showed high engagement and enthusiasm

Knowledge Impact (PO1)	Strengthened understanding of software project workflows, latest technologies, and industrial coding practices.	90-86% attainment High	Plan follow-up sessions on emerging technologies
Skill Development (PO2-PO5) PO10	Enhanced practical knowledge in programming, problem-solving, and IoT-based project design; exposure to industrial tools.	Average PO Attainment: 86-90%	Organize coding and IoT workshops in collaboration with CodeBind
Professional & Ethical Understanding (PO6-PO7)	Students observed teamwork, project ethics, and professional behavior within a tech industry setup.	83.2% attainment	Integrate case studies on industry ethics and real-world project handling
Motivation & Lifelong Learning (PO12)	Visit inspired students to pursue internships, develop projects, and explore entrepreneurial opportunities.	88.9% attainment	Encourage continuous learning through hackathons, seminars, and certification programs
Overall Impact	Visit provided valuable real-world exposure to software and IoT development, aligning academic concepts.	Overall PO Achievement: 87.9%	Highly Effective – strengthens student industry awareness and OBE learning goals
Future Action Plan	Conduct IoT and ML mini-project workshops with CodeBind mentors; encourage student participation in innovation challenges.	Expected ≥85% future attainment	Build partnership for continuous training and placement opportunities

Feedback Summary	Students gained practical insights into automation systems, PLCs, robotics integration, and process control technologies. Exposure to industry-grade automation projects enhanced learning relevance	PO1-88.9% PO2-86.4% PO3-84.8% PO4-81.5% PO5-89.2% PO6-86.4% PO7-84.8% PO8-86.4% PO9-84.8% PO10-85.6% PO11-88.9% PO12-87.3%	Visit was highly beneficial and interactive; students appreciated real-time demonstrations

Knowledge Impact (PO1)	Improved understanding of industrial control systems, sensors, actuators, and automation principles.	88.9% attainment	Conduct a post-visit seminar for automation technologies
Skill Development (PO2-PO5) PO10	Strengthened problem-solving and technical skills through exposure to PLC programming, robotic arms, and real-time monitoring systems.	Average PO Attainment: 85-89%	Plan a short-term workshop on automation tools (e.g., Siemens TIA Portal, PLC simulation)
Professional & Ethical Understanding (PO6-PO7)	Students understood professional roles, workplace ethics, and safety procedures in automation environments.	81.5% attainment	Include discussions on industry ethics and sustainable automation solutions
Motivation & Lifelong Learning (PO12)	Visit inspired students to explore careers in automation, embedded systems, and industrial IoT.	87.3% attainment	Encourage participation in automation-related internships and certifications
Overall Impact	Visit effectively bridged classroom learning with real-world automation practices, enhancing professional and technical awareness.	Overall PO Achievement: 86.2%	Highly Effective – supports experiential and outcome-based learning objectives
Future Action Plan	Organize workshops on Industrial Automation and IoT; collaborate with Base Automation for internship programs and technical talks.	Expected ≥80% future attainment	Strengthen industry-institute partnerships for applied learning and training

Knowledge Impact (PO1)	Gained exposure to product innovation methodologies, AI in design systems, and research-based product development	73.2-90.8% attainment	High	Encourage post-visit review sessions and student presentations on key learnings
Skill Development (PO2-PO5) PO10	Developed hands-on understanding of product modeling, AI prototyping, and automation tool utilization through lab interactions	PO3 -75.1% PO5 -84.9%		Plan technical workshops on AI-enabled product design and automation strategies
Motivation & Lifelong Learning (PO12)	Visit inspired participants to pursue higher studies, research internships, and design innovation challenges	80.4% attainment		Motivate students to engage in design competitions, research projects, and continuous learning initiatives
Overall Impact	Industrial visit effectively enhanced technical knowledge, design thinking ability, and AI innovation awareness, achieving strong PO alignment	Overall PO Achievement: 85.78%		Highly Effective – aligns with OBE and NEP frameworks, fostering practical exposure and innovation mindset
Future Action Plan	Organize product design and AI innovation workshops; invite IITDM experts for follow-up sessions; support mentorship and prototype development programs	Expected $\geq 70\%$ future attainment		Participants expressed strong interest in AI-driven design, automation research, and product innovation after the visit

Feedback, Impact Analysis and Action Taken Report for Industrial Visit

BATCH: 2024-2028

ACADEMIC YEAR: 2025-2026 ODD

YEAR: IICSE STUDENTS

TOPIC: IIITDM, Kanchipuram

DATE: 04.08.2025 to 08.08.2025

Category	Details / Observations	Quantitative Impact	Remarks / Action Taken
PO Mapping	PO1 - 2 PO2 - 2 PO3 - 2 PO4 - 2 PO5 - 2 PO6 - 2 PO7 - 2 PO8 - 2 PO9 - 2 PO10 - 2 PO11 - 2 PO12 - 2	Mapping Level: 2-3	Strong alignment with curriculum and OBE objectives; visit connected theory with industrial exposure
Feedback Summary	Students reported enhanced understanding of industrial processes, latest technologies, and real-time project environments	PO1 - 89.4% PO2 - 88.8% PO3 - 83.4% PO4 - 86.2% PO5 - 92.2% PO6 - 87.3% PO7 - 82.7% PO8 - 82.4% PO9 - 89.2% PO10 - 86.8% PO11 - 90.3% PO12 - 79.2%	High satisfaction; visit provided valuable practical exposure

Knowledge Impact (PO1)	Improved awareness of advanced technologies, product design processes, and research applications at IITDM	90-86% attainment High	High — Encourage post-visit technical report and discussion sessions
Skill Development (PO2-PO5) PO10	Enhanced technical and analytical skills through observation of live labs, design studios, and research demonstrations	PO3 -83.4% PO5 -92.2%	Plan follow-up sessions for CAD tools, prototyping, and product design
Motivation & Lifelong Learning (PO12)	Students inspired to pursue higher education, internships, and research projects after exposure to IITDM facilities	86.57% attainment	Encourage participation in innovation challenges and technical clubs
Overall Impact	Industrial visit significantly strengthened PO attainment and provided real-world understanding of design and manufacturing domains	Overall PO Achievement: 86.57%	Highly Effective – strong OBE alignment with practical exposure
Future Action Plan	Organize follow-up workshops on design thinking; invite IITDM faculty for interactive sessions; encourage students to apply for internships	Expected $\geq 70\%$ future attainment	Students expressed greater interest in pursuing research and industrial internships

Feedback, Impact Analysis and Action Taken Report for Workshop

ACADEMIC YEAR: 2024-2025 ODD

YEAR: CSE STUDENTS

TOPIC: Mendix and UI / UX Design

DATE: 23.01.2025

Category	Details / Observations	Quantitative Impact	Remarks / Action Taken
PO Mapping	PO1 -2 PO2 -1 PO3 -1 PO4 -1 PO5 -1 PO10 -1 PO12 -1	Mapping Level: 2-3	Strong alignment with coir processing and product design framework and OBE objectives
Feedback Summary	Participants reported better clarity on Mendix and UI / UX Design options, Coir-based product fabrication environment deployment processes, and coir fiber extraction and product conversion processes	PO1-70.8% PO2-73.4% PO3-81.4% PO4-87.2% PO5-91% PO10-86.8% PO12-79.2%	High satisfaction; workshop met expectations
Knowledge Impact (PO1)	Increased awareness of Mendix and UI / UX Design opportunities, Coir-based product fabrication environment service credits, and application requirements	85 - 92% attainment High	Include detailed Q&A or follow-up sessions

Development (PO2-PO5) PO10	Improved skills in evaluating options, writing coir production reports and technical documentations, preparing for performance evaluations	PO3 -81.4% PO5- -91%	Plan workshops on coir production reports and technical documentation writing, exam strategies
Motivation & Lifelong Learning (PO12)	Participants motivated to pursue higher studies; interest in certifications and research opportunities	86.57% attainment	Support through mentorship and guidance
Overall Impact	Workshop achieved strong PO alignment and enhanced student readiness for Mendix and UI / UX Design decisions	Overall PO Achievement: 73.4-84%	Highly Effective – aligns with vocational training framework
Future Action Plan	Organize coir production reports and technical documentation workshops; invite Coir-based product fabrication environment experts for experience sharing; provide mentorship for application process	Expected ≥80% future attainment	Participants are more interested in Mendix and UI / UX Design

Impact Analysis

2023-2024 EVEN

Guest Lecture on Higher Education Guidance (23.01.2024)

Category	Details / Observations	Quantitative Impact	Remarks / Action Taken
PO Mapping	PO1 -2 PO2 -1 PO3 -1 PO4 -1 PO5 -1 PO10 -1 PO12 -1	Mapping Level: 2-3	Strong alignment with curriculum and OBE objectives
Feedback Summary	Students reported better clarity on higher education options, admission processes, and career planning	PO1-89.4% PO2-88.8% PO3-83.4% PO4-86.2% PO5-92.2% PO10-86.8% PO12-79.2%	High satisfaction; lecture met expectations
Knowledge Impact (PO1)	Increased awareness of higher education opportunities, scholarships, and application requirements	90-86% attainment High	Include detailed Q&A or follow-up sessions
Skill Development (PO2-PO5) PO10	Improved skills in evaluating options, writing SOPs, preparing for entrance exams	PO3 -83.4% PO5 -92.2%	Plan workshops on SOP writing, exam strategies

Motivation & Lifelong Learning (PO12)	Students motivated to pursue higher studies; interest in certifications and research opportunities	86.57% attainment	Support through counseling and mentoring
Overall Impact	Lecture achieved strong PO alignment and enhanced student readiness for higher education decisions	Overall PO Achievement: 86.57%	Highly Effective – aligns with OBE framework
Future Action Plan	Organize SOP workshops; invite alumni for experience sharing; provide mentorship for application process	Expected $\geq 70\%$ future attainment	Students are more interested in Higher Education after UG

Feedback, Impact Analysis and Action Taken Report for Seminar

ACADEMIC YEAR: 2022-2023 ODD

YEAR: CSE STUDENTS

TOPIC: Data Science using Python

DATE: 13.09.2022

Category	Details / Observations	Quantitative Impact	Remarks / Action Taken
PO Mapping	PO1 -2 PO2 -1 PO3 -1 PO4 -1 PO5 -1 PO10 -1 PO12 -1	Mapping Level: 2-3	Strong alignment with data-based framework and academic objectives
Feedback Summary	Participants reported better clarity on data science using python options, data science data analytics assessment and data science configuration and performance principles deployment processes, and data science architecture and implementation techniques	PO1-79.4% PO2-86.9% PO3-83.4% PO4-90.7% PO5-79.9% PO10-73.9% PO12-80.8%	High satisfaction; seminar met expectations
Knowledge Impact (PO1)	Increased awareness of data science using python opportunities, data science data science simulation tools and frameworks, and information science requirements	73.9-90.7% attainment High	Include detailed Q&A or follow-up sessions

Skill Development (PO2-PO5) PO10	Improved skills in evaluating options, writing data-based incident reports, preparing for data science data science management and science practices	PO3 -83.4% PO5 -79.9%	Plan seminar on data-based incident reports writing exam strategies
Motivation & Lifelong Learning (PO12)	Participants motivated to pursue higher studies; interest in certifications and research opportunities	80.8% attainment	Support through mentorship and guidance
Overall Impact	Seminar achieved strong PO alignment and enhanced student readiness for seminar on data science using python decisions	Overall PO Achievement: 85.87%	Highly effective -- aligns with academic framework
Future Action Plan	Organize data-based incident reports workshops; invite data science data data analytics assessment and data science configuration and performance principles experts for experience sharing; provide mentorship for application process	Expected $\geq 80\%$ future attainment	Participants are more interested in Data Science using Python
