Feedback, Impact Analysis and Action Taken Report for Internship/Industrial Training

Academic Year: 2023-2024(EVEN)

Program: Bachelor of Engineering in Computer Science & Engineering

Batch: 2021-2025

Subject: CS1703-SUMMER INTERNSHIP

1.0 Executive Summary

This document summarizes the process of collecting feedback, analysing the impact on Program Outcomes (POs), and implementing corrective actions for the Internship/Industrial Training program. The analysis for the 2023-2024 cohort revealed strong performance in technical competencies (PO1, PO2) but identified gaps in Environment and sustainability & Ethics. In response, the department has implemented a mandatory pre-internship workshop on Nurturing the Entrepreneur: Turning Opportunities into Success. This demonstrates our commitment to continuous improvement based on direct and indirect evidence.

2.0 Feedback Collection Methodology

2.1 Data Sources & Tools:

We employ a multi-pronged approach to gather comprehensive feedback.

Source	Tool	Purpose	Administered
Industry Supervisors	Structured Rubric	Direct assessment of student performance.	End of Internship
Students	Online Feedback	Self-assessment of PO attainment and qualitative feedback on experience.	End of Internship
Faculty Coordinators	Final Report & Presentation Evaluation Rubric	Academic assessment of learning reflection and communication.	End of Summer Internship

2.2 Sample Feedback Tools:

- Industry Supervisor Evaluation Form.
- Student Feedback Form.
- Final Presentation Rubric.

3.0 Impact Analysis on Program Outcomes (POs)

3.1 Direct Attainment Calculation:

- **Target Attainment Level:** 80%
- **Calculation Method:** The average score for each PO from all direct attainment and indirect attainment.

Table 3.1: Direct & Indirect PO Attainment from Internship

Program Outcome (PO)	PO Description	Average Attainment (%)	Met Target? Then Justify
PO1	Engineering Knowledge	83.5%	Yes, Students effectively applied engineering fundamentals in practical tasks. Students demonstrated strong application of engineering fundamentals and theoretical knowledge to practical tasks during internships, achieving satisfactory attainment.
PO2	Problem Analysis	91.7%	Yes, Students effectively analyzed real-world problems and applied engineering reasoning to identify root causes and solutions, meeting the expected target level.
PO3	Design/Development of Solutions	84.6%	Yes, Students successfully applied design principles to develop or improve engineering solutions and processes, showing a clear understanding of design methodologies.
PO4	Investigation of	84.4%	Yes, Students displayed strong investigative

	Complex Problems		and analytical skills by collecting, interpreting, and evaluating data to address complex engineering issues.
PO5	Modern Tool Usage	81.5%	Yes, Students proficiently used modern tools, equipment, and software relevant to their domain, meeting the target level for technical competency.
PO6	The engineer and society	82.2%	Yes, Students showed awareness of social and professional responsibilities, recognizing the societal implications of engineering practices at their workplace.
PO7	Environment and sustainability	77%	No, Although students had basic awareness of environmental issues, they did not adequately integrate sustainability principles in their internship work, leading to below-target attainment.
PO8	Ethics	77.3%	No, Students followed ethical practices to some extent, but their understanding and consistent demonstration of professional ethics and integrity were limited; improvement needed.
PO9	Individual & Team Work	91.2%	Yes, Students worked efficiently both as individuals and as part of teams, demonstrating strong collaboration, adaptability, and accountability.
PO10	Communication	89.8%	Yes, Students effectively communicated technical ideas through presentations, reports, and discussions, achieving the desired professional communication standards.

PO11	Project management and finance	95.7%	Yes, Students gained good exposure to project planning, scheduling, and financial aspects during internships, demonstrating managerial and organizational skills beyond expectations.
PO12	Life-long learning	90.5%	Yes, Students exhibited enthusiasm for self-learning and adaptability to new technologies, reflecting a strong foundation for continuous professional development.

3.2 Direct & Indirect Attainment & Qualitative Feedback (From Student Survey):

Student Self-Assessment:

Students rated their own confidence in achieving each PO on a scale of 1-5. The results largely correlated with direct attainment but showed lower confidence in PO7 and PO8.

Key Qualitative Themes from Student Feedback:

Strengths:

- Excellent exposure to real-world software development life cycles.
- Mentorship helped improve my problem-solving and debugging skills.

Areas for Improvement (Gaps Identified):

- Environment and sustainability (Links to low PO7)
- Ethics (Links to low PO8)

3.3 Summary of Key Findings:

- **Strengths:** The internship program is highly effective in problem analysis (PO2), Individual & Team Work (PO9), and developing professional skills like Project management and finance and Life-long learning (PO11, PO12).
- **Gaps Identified:**
 1. **PO7(Environment and sustainability):**

Target: 80%

Actual Attainment: 77%

Gap: -3% (Target not met)

Reason Identified: Insufficient emphasis on environmental impact analysis in project work and limited exposure to green technologies.

2. **PO8 (Ethics):**

Target: 80%

Actual Attainment: 77.3%

Gap: -2.7% (Target not met)

Reason Identified: Ethics component was not strongly embedded in regular course assessments.

4.0 Action Taken Report:

Based on the impact analysis from the 2023-2024 academic year, the following corrective actions were planned, approved, and implemented for the 2024-2025 internship cycle.

Table 4.1: Action Plan & Implementation Evidence

Gap Identified (AY 2023-24)	Corrective Action Planned	Responsibility	Implementation Evidence from AY 2024-25	Status
Low attainment in 07 Environment and sustainability	1. Introduce Pre-Internship Awareness Sessions: Conduct seminars/workshops 3. Encourage Sustainable Projects: Motivate students to participate in eco-friendly or energy-efficient projects during internship.	Department Internship Coordinator Faculty Mentors	Workshop schedules, attendance sheets, and feedback forms.	In Progress Partially Implemented
Low attainment in PO8 (Ethics)	1. Conduct Ethical Awareness & Professional Conduct Training: Include sessions on professional	Department Internship Coordinator Faculty Mentors /	Updated evaluation form including ethics criteria.- Feedback summaries from industry mentors.-	In Progress / Monitoring Ongoing — Ethical awareness

integrity, confidentiality, and workplace discipline before internship. policies.	Industry Mentors	Student reflection reports reviewed by faculty.	and professional behavior expected to improve through structured sensitization and continuous monitoring.
2. Industry Mentor Feedback :Collect structured feedback from supervisors on student ethical performance.			Partially Implemented

5.0 Preliminary Impact of Actions & Future Plan

5.1 Early Indicators from AY 2023-24:

While the full analysis for the current year is pending, preliminary data is encouraging:

- **Qualitative Feedback/Evaluation of Internship:** Student comments specifically mention the helpfulness of the Pre-Internship workshop.
- **Supervisor Feedback:** Supervisors have noted better preparedness in using version control systems.

5.2 Plan for Next Cycle (AY 2024-25):

1. **Consolidate Improvements:** Continue and refine the Pre-Internship workshop.
2. **New Action:**
 - Introduce "Sustainability in Engineering Practice" workshop before internship commencement.
 - Encourage participation in eco-innovation or sustainability-related projects during internship.
 - Require students to prepare a Reflection Report on ethical dilemmas faced during their internship.
3. **Monitor:**
 - Continuous monitoring through monthly mentor reviews and industry supervisor feedback during internship.

- Evaluation of internship reports and assessment rubrics to measure improvement.

6.0 Conclusion

Based on the internship PO attainment analysis, most program outcomes achieved or exceeded the target level, indicating strong technical and professional competency among students. However, PO7 (Environment and Sustainability) and PO8 (Ethics) showed relatively lower attainment, emphasizing the need for enhanced ethical orientation and environmental consciousness.

OFF INCHARGE

Feedback, Impact Analysis, and Action Taken Report for Internship/Industrial Training

Academic Year: 2022-2023(EVEN)

Program: Bachelor of Engineering in Computer Science & Engineering

BATCH:2020-24

Subject:CS1703-SUMMER INTERNSHIP

1.0 Executive Summary

The internship program played a crucial role in enhancing students' ethical awareness and project management capabilities through real-world exposure. While students demonstrated professional integrity and teamwork, the analysis for AY 2022–2023 indicated slightly lower attainment levels in Ethics (PO8) and Project Management and Finance (PO11) due to limited integration of these aspects in evaluation activities. To address this, the department strengthened ethical learning through assignments, seminars, and case studies and organized a workshop to improve students' understanding of financial planning, budgeting, and managerial practices. These initiatives collectively enhanced students' sense of responsibility, decision-making, and leadership skills, ensuring they are better prepared to uphold ethical standards and effectively manage projects in professional environments.

2.0 Feedback Collection Methodology

2.1 Data Sources & Tools:

We employ a multi-pronged approach to gather comprehensive feedback.

Source	Tool	Purpose	Administered
Industry Supervisors	Structured Rubric	Direct assessment of student performance .	End of Internship
Students	Online Feedback	Self-assessment of PO attainment and qualitative feedback on experience.	End of Internship
Faculty Coordinators	Final Report & Presentation	Academic assessment of learning reflection and	End of Summer Internship

	Evaluation Rubric	communication.	
--	-------------------	----------------	--

2.2 Sample Feedback Tools :

Industry Supervisor Feedback Form.

Student Feedback Form.

Final Presentation Rubric.

3.0 Impact Analysis on Program Outcomes (POs)

3.1 Direct Attainment Calculation

- **Target Attainment Level:** 70%
- **Calculation Method:** The average score for each PO from all direct attainment and indirect attainment.

Table 3.1: Direct & indirect PO Attainment from Internship

Program Outcome (PO)	PO Description	Average Attainment (%)	Met Target? Then Justify
PO1	Engineering Knowledge	70.5%	Yes, Students have effectively applied the fundamental concepts of science, mathematics, and engineering principles to real-world industrial problems during their internship. The feedback from industry mentors and evaluation reports indicate that students demonstrated a sound understanding of core engineering knowledge in performing assigned tasks, problem-solving, and using relevant tools or techniques.
PO2	Problem Analysis	74.1%	Yes, Students demonstrated the ability to identify, analyze, and define engineering problems encountered during the internship. They applied appropriate analytical and logical reasoning to propose effective solutions, as reflected in mentor feedback and internship

	Evaluation Rubric	communication.	
--	-------------------	----------------	--

2.2 Sample Feedback Tools :

Industry Supervisor Feedback Form.

Student Feedback Form.

Final Presentation Rubric.

3.0 Impact Analysis on Program Outcomes (POs)

3.1 Direct Attainment Calculation

- **Target Attainment Level:** 70%
- **Calculation Method:** The average score for each PO from all direct attainment and indirect attainment.

Table 3.1: Direct & indirect PO Attainment from Internship

Program Outcome (PO)	PO Description	Average Attainment (%)	Met Target? Then Justify
PO1	Engineering Knowledge	70.5%	Yes, Students have effectively applied the fundamental concepts of science, mathematics, and engineering principles to real-world industrial problems during their internship. The feedback from industry mentors and evaluation reports indicate that students demonstrated a sound understanding of core engineering knowledge in performing assigned tasks, problem-solving, and using relevant tools or techniques.
PO2	Problem Analysis	74.1%	Yes, Students demonstrated the ability to identify, analyze, and define engineering problems encountered during the internship. They applied appropriate analytical and logical reasoning to propose effective solutions, as reflected in mentor feedback and internship

			reports. This indicates that students possess strong problem-solving skills and can apply theoretical knowledge to practical, real-world situations.
PO3	Design/Development of Solutions	82.8%	Yes, Students effectively applied design principles to develop practical solutions for engineering problems encountered during the internship. They contributed to the improvement or optimization of existing processes and systems, showing creativity and technical competence. The attainment reflects their ability to design solutions that meet specified needs while considering functional and safety aspects.
PO4	Investigation of Complex Problems	82.6%	Yes, Students demonstrated the ability to investigate complex engineering problems by collecting data, analyzing results, and interpreting findings effectively during their internship. They applied appropriate research methods, experimentation, and logical reasoning to arrive at valid conclusions. The achievement shows that students are capable of independent inquiry and evidence-based problem solving in practical settings.
PO5	Modern Tool Usage	91.8%	Yes, Students effectively utilized modern engineering and IT tools during their internship for modeling, analysis, design, and documentation. They demonstrated proficiency in using relevant software, instruments, and technologies required for their tasks. This indicates that students are well-prepared to apply appropriate modern tools with an understanding of their limitations in real-world engineering environments.

PO6	The engineer and society	91.7%	Yes, Students showed awareness of societal, health, safety, and legal responsibilities relevant to their engineering practice during the internship. They demonstrated an understanding of how engineering solutions influence society and addressed workplace issues ethically and responsibly. This attainment indicates that students can apply their technical knowledge considering societal and professional contexts.
PO7	Environment and sustainability	91.9%	Yes, Students demonstrated awareness of environmental impacts and sustainability considerations related to engineering activities during their internship. They showed understanding of eco-friendly practices, resource conservation, and sustainable development principles in their assigned tasks. The attainment indicates that students can evaluate engineering solutions in the context of environmental and societal responsibility.
PO8	Ethics	69.4%	No, Some students failed to consistently demonstrate ethical and professional behavior during the internship. Feedback from mentors indicated issues such as lack of punctuality, inadequate responsibility, or limited awareness of workplace ethics. This suggests a need for greater emphasis on ethical understanding and professional conduct through orientation programs and value-based sessions.

PO9	Individual & Team Work	74.5%	Yes, Students effectively worked both independently and as part of a team during their internship. They collaborated with colleagues, communicated ideas clearly, and contributed to achieving common goals in the workplace. The attainment reflects that students possess strong teamwork, leadership, and interpersonal skills required for professional engineering environments.
PO10	Communication	73.9%	Yes, Students demonstrated effective communication skills during their internship through regular reporting, presentations, and interactions with industry mentors and team members. They were able to convey technical ideas clearly in both oral and written forms. The attainment indicates that students possess the communication competence required for professional engineering practice.
PO11	Project management and finance	66.1%	No, Students showed limited understanding of project planning, scheduling, cost estimation, and financial aspects during the internship. Many were unable to effectively apply management principles or analyze resource utilization in their assigned tasks. This indicates a need to strengthen students' exposure to project management tools, budgeting concepts, and real-world financial decision-making.
PO12	Life-long learning	81%	Yes, Students showed limited initiative in updating their technical knowledge or exploring new skills beyond assigned internship tasks. Feedback indicated a lack of self-motivation to learn emerging tools

			or technologies independently. This suggests the need to encourage continuous learning habits and awareness of current trends through seminars, workshops, and self-learning activities.

3.2 Direct & Indirect Attainment & Qualitative Feedback (From Student Survey):

- **Student Self-Assessment:** Students rated their own confidence in achieving each PO on a scale of 1-5. The results largely correlated with direct attainment but showed lower confidence in PO8 and PO11. The majority indicated moderate to strong confidence in maintaining ethical conduct, professionalism, and teamwork during the internship. However, a few respondents expressed the need for greater exposure to ethical case studies and financial decision-making scenarios. Students acknowledged learning to manage project tasks, schedules, and resources but desired more structured guidance on budgeting and cost analysis.

- **Key Qualitative Themes from Student Feedback:**

Strengths:

- Enhanced collaboration and leadership skills through project-based teamwork.
- Mentorship helped improve my problem-solving and debugging skills.

Areas for Improvement (Gaps Identified):

- Ethics (Links to low PO8)
- Project management and finance (Links to low PO11)

3.3 Summary of Key Findings:

- **Strengths:** The internship program is highly effective in Modern Tool Usage (PO5), The engineer and society (PO6) & Environment and sustainability (PO7), and developing professional skills like Design/Development of Solutions and Investigation of Complex Problems (PO3, PO4).
- **Gaps Identified:**
 1. PO8 (Ethics):
 - Target: 70%
 - Actual Attainment: 69.4%

Gap: -0.6% (Target not met)

Reason Identified:

- Ethical aspects were not strongly integrated into the project evaluation and internship assessment framework.
- Limited opportunities for students to engage in structured discussions or real-world case studies related to professional ethics.

2. **PO11** (Project management and finance):

Target: 70%

Actual Attainment: 66.1%

Gap: -3.9% (Target not met)

Reason Identified:

- Students lacked sufficient exposure to project planning, budgeting, and financial management during internship activities.
- Limited awareness of financial tools, cost estimation methods, and resource optimization practices.

4.0 Action Taken Report:

Based on the impact analysis from the 2022-2023 academic year, the following corrective actions were planned, approved, and implemented for the 2023-2024 internship cycle.

Table 4.1: Action Plan & Implementation Evidence

Gap Identified (AY 2022-23)	Corrective Action Planned	Responsibility	Implementation Evidence from AY 2023-24	Status
Low attainment in PO8 (Ethics)	Conduct an Ethics Awareness Workshop: Organize sessions on professional ethics, workplace discipline, integrity, and code of conduct with case studies from industry. Guest Lecture / Expert Talk: Invite industry professionals to share real-life ethical challenges and	Faculty Coordinator Head of Department	Guest Lecture / Expert Talk Invitation letters or emails sent to industry professionals. Attendance sheets of participants. Photos or video recordings of the	Partially Implemented

	how they are handled in engineering and corporate settings.		lecture.	
Low attainment in PO11 Project management and finance	Value-added Training: Offer short-term courses on Project Management Fundamentals or Engineering Economics to strengthen understanding.	Faculty Coordinator Head of Department	Training Schedule / Agenda Detailed program schedule showing topics covered, dates, and duration. Attendance Records Sign-in sheets or digital attendance logs of participants.	Partially Implemented

5.0 Preliminary Impact of Actions & Future Plan

5.1 Early Indicators from AY 2022-23:

While the full analysis for the current year is pending, preliminary data is encouraging:

- **Qualitative Feedback/Evaluation of Internship:**

Initial qualitative feedback from students indicated a significant improvement in their ethical awareness and understanding of project management principles after implementing the corrective measures. Students appreciated the inclusion of ethics-based assessments and the workshop.

- **Supervisor Feedback:**

Industry supervisors observed noticeable progress in students' professional behaviour, accountability, and adherence to workplace ethics.

5.2 Plan for Next Cycle (AY 2023-24):

1. **Conduct an Ethics Awareness Workshop:**
2. Organize sessions on professional ethics, workplace discipline, integrity, and code of conduct with case studies from industry.
3. **Guest Lecture / Expert Talk:** Invite industry professionals to share real-life ethical challenges and how they are handled in engineering and corporate settings.

outcomes, reflecting stronger professional integrity and managerial capability among students. Moving forward, sustained monitoring, curriculum integration, and collaborative engagement with industry partners will further strengthen the overall quality and relevance of the internship program, aligning it with the vision of producing competent, ethical, and industry-ready engineering graduates.
